Eurol Petrol Injection Cleaner

Fuel additive for cleaning petrol injectors

Description

Eurol Petrol Injection Cleaner is formulated to clean contaminated petrol injection systems, to restore injector efficiency and to improve fuel atomization. Removes carbon deposits and deposits from fuel lines, fuel distributors, injection and inlet valves.

Eurol Petrol Injection Cleaner is recommended for vehicles with rough idling, stumbling due to dirty injectors (clogged injector nozzles) that are restricted due to fuel deposits or if the engine is having a hard time with tough starts or it may be running roughly.

Eurol Petrol Injection Cleaner can be used in vehicles equipped with a catalytic converter.

The 250ml bottle of Eurol Petrol Injection Cleaner is recommended for use in 35L to 65L of fuel and let the cleaner run through the fuel system.

Add the Eurol Petrol Injection Cleaner to the fuel tank before refueling. For best results use about once every 2.500 km because deposits form with every tank of fuel. Also change the air and fuel filters for regular maintenance, especially with in-city driving conditions. After using this product, you should notice better performance from the engine when accelerating and a quieter engine when running stationary. An injection cleaner will not repair actual mechanical failures (ignition, timing, etc).

Users should consult the Material Safety Data Sheet of Eurol Petrol Injection Cleaner for information about storage and shelf life. Please ask Eurol Research & Development if any further information is required.

Physical properties

Colour	Colourless	
Density at 20°C	0.807 kg/l	ASTM D 4052
Viscosity, kinematic at 40°C	2.8 cSt	ASTM D 445
Flash point	62 °C	ASTM D 93
